The Theory and Technique of Electronic Music

Operating a studio can be a daunting task for an electronic music composer. A studio is a place where an artist can create and produce a piece of music that is not immediately available outside of the studio. A studio typically consists of a control room, a recording room, and a mixing room. The control room is where the electronic music composer works, while the recording room is where the audio is recorded and mixed. The mixing room is where the final mix is created. A studio can be a small, simple setup or a large, complex setup with advanced features.
