Creating Minds: An Anatomy of Creativity as Seen Through the Lives of Freud, Einstein, Picasso, Stravinsky, Eliot, Graham, and Gandhi. Howard Gardner changed the way we think about intelligence. In his classic work Frames of Mind, he undermined the common notion that intelligence is a single capacity that every human being possesses to a greater or lesser extent.

Since it was first published in 1993, Creating Minds has served as a peerless guide to the creative self. Now available as a paperback reissue with a new introduction by the author, the book uses portraits of seven extraordinary individuals to reveal the patterns that drive the creative process, and to demonstrate how circumstance also plays an indispensable role in creative success.
