Project Management With Dynamic Scheduling
Many commercial project scheduling software products allow for dynamic scheduling. Here are the critical elements required for the dynamic schedule to work. Dynamic Project Scheduling Element #1: Predecessors. Your dynamic project schedule must not be based on fixed start and finish dates. It must be based on predecessor relationships between tasks.

Project Scheduling: Dynamic Techniques
The topic of this book is known as dynamic scheduling, and is used to refer to three dimensions of project management and scheduling: the construction of a baseline schedule and the analysis of a project schedule’s risk as preparation of the project control phase during project progress. This dynamic scheduling point of view implicitly assumes that the usability of a project’s baseline schedule is rather limited and only acts as a point of reference in the project life cycle.
