Traditionally, the tribal communities of Rajasthan are pastoralists. The varied grasses, shrubs and low branches of trees provide fodder for sheep, camels and cattle. Generations of lore and logic have distilled a bank of knowledge on the medicinal properties of arid plant species, which is now being used for commercial ayurvedic preparations too.

The predominant vegetation of Rajasthan is scrub jungle. Toward the west there are typical arid-zone plants, such as tamarisk (genus Tamarix) and false tamarisk (genus Myricaria). Trees are scarce, limited mostly to small, scattered forest areas in the Aravallis and in the eastern part of the state.
